Ardence Product Release Notice

Ardence™ Software-Streaming Platform 4.1 SP 1

Ardence, a Citrix Company, announces the release of Version 4.1 Service Pack 1 of the Ardence Software-Streaming Platform. It includes:

- A roll-up of all previously released 4.1 hot fixes
- Fixes for other non-critical bugs
- Minor feature enhancements

This document provides the highlights of the feature enhancements contained in this release. For detailed information, please refer to the Ardence 4.1 SP 1 Release Notes included with the distribution.

Product Version: Ardence 4.1 SP 1

Date: April 12, 2007

Contact: Ardence Enterprise Product Manager

Email: EnterprisePM@ardence.com

Feature Enhancements

This release includes the following feature enhancements

- **Microsoft Data Execution Protection (DEP) Compatibility:** In previous versions, the Ardence Streaming Service and License Manager required disabling of the Microsoft DEP feature. This constraint has been removed.
- **Enhanced Active Directory Integration:** Administrators can add/remove clients to/from an Active Directory domain directly from the Ardence Administrator application.
- **Client Groups Feature:** The Client Groups feature provides a method to quickly manage multiple clients collectively. The Release Notes include documentation describing the access and use of this feature.
